PROFESSIONAL SUMMARY

Senior Backend Engineer with 5+ years of experience building scalable, cloud-native systems using Node.js, TypeScript, and Python. Specialized in high-performance APIs, event-driven architectures, and DevOps automation on AWS. Proven track record of owning services end-to-end, improving reliability and latency, and shipping production-ready features for global users. Experienced working asynchronously with distributed teams across time zones.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript (ES6+), Python, SQL

Backend: Node.js, Express.js, Django, Flask

Architecture: Microservices, Event-Driven Systems (Kafka), Serverless (AWS Lambda)

APIs: REST, OAuth2, JWT, OpenAPI/Swagger

Databases: PostgreSQL, MongoDB, MySQL, Redis

Cloud & DevOps: AWS (Lambda, S3, CloudFront, DynamoDB), Docker, Kubernetes, Terraform, CI/CD (GitHub Actions, Jenkins)

Testing: Jest, Unit/Integration Testing, API Contract Testing, TDD

Practices: Agile/Scrum, Code Reviews, System Design, Observability

PROFESSIONAL EXPERIENCE

AI Software Engineer | Punch LLC (Lagos, Remote Collaboration) | Oct 2025 – Mar 2026

- Owned backend services for AI-driven features, designing scalable APIs and service boundaries.
- Built production-grade services in Node.js (TypeScript), improving reliability and maintainability.
- Delivered an AI-powered chatbot that reduced support turnaround time and improved user engagement.
- Integrated third-party AI APIs and automated workflows to streamline operations.
- Drove performance optimizations across services, improving response times and stability in production.

Software Engineer | Mark Patteson Software Inc (Remote, USA) | Apr 2025 – Jul 2025

- Designed and shipped RESTful APIs in Node.js (TypeScript) serving production workloads.
- Modeled and optimized MongoDB schemas, reducing query latency and improving throughput.
- Implemented Kafka-based event pipelines for real-time billing and onboarding systems.
- Automated infrastructure with Terraform (AWS Lambda, DynamoDB), ensuring repeatable deployments.
- Achieved 90%+ test coverage with unit, integration, and contract tests.
- Contributed to system design decisions and code reviews in a fully remote environment.

DevOps Engineer | Practical DevOps, Benin City, Nigeria | Sep 2024 – Mar 2025

- Architected and deployed a scalable 3-tier application (React, Node.js, MySQL) on AWS.
- Built CI/CD pipelines enabling 30+ deployments/week, reducing release cycle time.
- Provisioned infrastructure with Terraform (S3, CloudFront), cutting hosting costs by 35%.
- Improved system performance by 30% via tuning, caching, and process optimization.
- Maintained 99.9% uptime through monitoring, alerting, and incident response.

Backend Engineer | Max Migold, Lagos, Nigeria | Aug 2023 – Feb 2024

- Developed backend services with Node.js and MongoDB for high-traffic applications.
- Built a real-time referral microservice to track user activity and rewards.
- Optimized APIs handling 10,000+ req/min with <150ms latency.
- Implemented CI/CD with Jenkins and Docker, reducing deployment errors.
- Partnered with QA to define API contracts and ensure reliability.

Software Engineer Intern | ALX Africa (Remote) | Aug 2022 – Nov 2023

- Automated server operations with Bash scripts, reducing manual overhead.
- Implemented SSL/TLS automation for secure production environments.
- Authored API documentation (Swagger/JSDoc), improving onboarding for engineers.

SELECTED PROJECTS

Event-Driven Billing System

- Designed Kafka-based workflows for real-time billing and onboarding; ensured idempotency and fault tolerance.

AI Chatbot Integration

- Built and integrated a production chatbot using external AI APIs; improved support efficiency and user experience.

Infrastructure as Code (AWS + Terraform)

- Provisioned serverless and CDN-backed architectures (Lambda, S3, CloudFront) with repeatable deployments.

EDUCATION

Ensign College – B.S. Systems Administration (In Progress) | 2025 – 2027

University of Benin – B.Eng. Petroleum Engineering | 2012 – 2017

CERTIFICATIONS

- ALX Africa – AI for Devs (2025)
- ALX Africa – AI and Career Essentials (2024)
- ALX Africa – Software Engineering (Backend)
- AWS – DevOps on AWS
- AWS – Cloud Computing & Storage Foundations
- Cisco – Networking Basics & Device Configuration
- DataCamp – Associate Data Scientist

KEY IMPACT

- Reduced cloud costs by **35%** via Terraform-based optimization.
- Sustained **99.9% uptime** across production services.
- Optimized APIs to **10,000+ req/min** with sub-150ms latency.
- Enabled **30+ weekly deployments** through CI/CD automation.
- Maintained **90%+ test coverage**, lowering production defects.
